

# Our Slimefun Server

It's crazy, but we run a server that utilizes Slimefun, which is how we've learned so much about slimefun

Our server can be access at [mc.gamerscharisma.com](https://mc.gamerscharisma.com)

It does require going through an automatic whitelist process in our discord server, which is found at <https://discord.gamerscharisma.com>

That server is also where reports of issues with the minecraft server can also be made

## Slimefun Addons

---

Our server currently (at time of writing) runs Slimefun4 along with these addons:

- ChestTerminal
- ColoredEnderChests
- DyedBackpacks
- EMCTech
- ExtraGear
- FluffyMachines
- FNAmplifications
- FoxyMachines
- Galactifun
- HotbarPets
- InfinityExpansion
- MobCapturer
- Networks
- PotionExpansion
- PrivateStorage
- SFCalc
- SimpleMaterialGenerators
- SimpleStorage
- SlimeCustomizer
- SlimeHUD
- SlimeTinker
- SlimyTreeTaps

- SoulJars

# Additional Plugins

---

Along with Slimefun, here are some of our additional plugins we run for added functionality

## Vivecraft

We run the Vivecraft plugin so that users playing in VR and those playing from desktop mode with Vivecraft installed will be able to properly see VR player's movements

## Simple Voice Chat

A built in proximity and group voice chat for minecraft. Primarily makes it easier for VR players to community as typing in VR is not great

## GeyserMC + Floodgate

Connect from a bedrock client to play from anything, anywhere, anytime!

## VeinMiner

Makes it easier to do mass environmental damage to gather logs, or to quickly mine a vein of ore

## ViaVersion + ViaBackwards

Be able to connect from multiple different client versions

## Vane

Double doors work together, right click to automatically collect harvest and replant, improved night skip if enough people sleep.

## Pl3xmap

Use the server domain in a browser to view a map of multiple worlds

## BestTools

Automatically switch to the best tool in your hotbar for the block you are destroying, refill your hand automatically with the same block from your inventory

## ChestSort

Sort chests with a right click, or have them set to automatically sort

## InvUnload

Be able to quickly unload your inventory into chests near you
